

Description

The combination of tylosin and doxycycline acts additive. Doxycycline belongs to the group of tetracyclines and acts bacteriostatic against many Gram-positive and Gram -negative bacteria like Bordetella, Campylobacter, E. coli, Haemophilus, Pasteurella, Salmonella, Staphylococcus and Streptococcus spp. Doxycycline is also active against Chlamydia, Mycoplasma and Rickettsia spp. The action of doxycycline is based on inhibition of bacterial protein synthesis. Doxycycline has a great affinity to the lungs and is therefore especially useful for treatment of bacterial respiratory infections. Tylosin is a macrolide antibiotic with a bacteriostatic action against Gram-positive and Gram-negative bacteria like Campylobacter, Pasteurella, Staphylococcus, Streptococcus and Treponema spp. and Mycoplasma.

Composition

Each kg contains

Tylosin Tartrate.....	200 g(Act.)
Doxycycline hyclate.....	250 g(Act.)

Indication

To treatment the following diseases caused by pathogenic bacteria susceptible to Tylosin and Doxycycline.

Calves, Swine, sheep, goats and horse

Pleural pneumonia, Colibacillosis, Strepto-coccosis, Mycoplasmasis and etc.

Poultry

CRD, CCRD, ILT, IT caused by Mycoplasma, Hemophilus, Streptococcus, Staphylococcus.

Dosage & Administration

Administer the following dose mixed with feed orally.

Poultry-Administer 1g diluted with per 2 L of drinking water.

Swine, sheep, goats and horse-Administer 1g diluted with per 40kg of body weight.

Cattle-Administer 1g diluted with per 60kg of body weight.

Packaging Unit

100g, 500g, 1kg, 5kg, 10kg

Storage and expiry date

Store in an airtight container at dry room temperature (1 to 30° C) protected from light.

24 months from date of manufacture

Precaution

Withdrawal times

Meat: 15 days

Egg: 4days

Consult with your veterinarian.
